

Sales Performance Analysis & Reporting

End-to-end data cleaning, analysis and executive dashboard delivery
using Power Query, Excel, Jira and Confluence

Business Problem: A retail sales team operated with raw, inconsistent transaction data and had no structured reporting system. As the project PM, I was tasked with delivering a clean, reliable executive dashboard from scratch.

01

Data Ingestion

Sourced raw sales CSV (305 rows). Loaded into Excel Power Query for structured transformation.

02

Data Cleaning

Removed blanks, duplicates & null dates. Standardised text, fixed mixed date formats, added Month/Quarter columns.

03

Analysis

Built 5 pivot tables covering revenue trends, product mix, regional performance, sales rep KPIs and order status.

04

Dashboard Delivery

Designed interactive executive dashboard with 4 KPI cards, 5 charts and 3 slicers for dynamic filtering.

Tools Used: Microsoft Excel · Power Query · Pivot Tables · Jira (Scrum) · Confluence | Dataset: 305 raw rows → 240 clean rows

Monthly Revenue Trend (FY2024)

Revenue by Product

Key Insight: Laptop Pro accounts for ~72% of total revenue (\$265K of \$367K) — a significant concentration risk that warrants strategic attention.

Revenue by Region

Sales Rep Performance

Order Status Breakdown

Regional Gap

South outperforms East by 118% (\$122K vs \$56K). East region requires investigation into staffing, pipeline or pricing strategy.

Rep Performance Gap

Bob Smith (\$89K) outperforms David Lee (\$50K) by 79%. Best practices from top performers should be captured and replicated.

High Return Rate

26% return rate is above acceptable threshold. Root cause analysis recommended — product quality or order accuracy.

Based on data analysis, five prioritised recommendations are presented below.

HIGH

R1 — Reduce Revenue Concentration Risk

Finding: Laptop Pro = ~72% of revenue (\$265K of \$367K)

Action: Develop a product diversification strategy. Set revenue targets for underperforming lines (USB Hub, Wireless Mouse). Reduce Laptop Pro dependency to <50% within 2 years.

HIGH

R2 — Investigate & Reduce Return Rate

Finding: 26% return rate ; industry avg is ~10%

Action: Conduct root cause analysis on 74 returned orders. Identify if returns cluster by product, region or rep. Implement order verification checklist.

MED

R3 — Address East Region Underperformance

Finding: East = \$56K vs South = \$122K (118% gap)

Action: Review East region headcount, territory size and pipeline health. Consider reassigning top-performing rep to mentor East team.

MED

R4 — Replicate Top Performer Best Practices

Finding: Bob Smith (\$89K) outperforms David Lee (\$50K) by 79%

Action: Document Bob Smith's sales approach, client engagement frequency and product mix. Develop training programme based on observed behaviours.

LOW

R5 — Address Seasonal Revenue Dips

Finding: Feb (\$10K) and May (\$13K) significantly below average

Action: Plan targeted promotional campaigns or incentive programmes for low-revenue months. Align marketing spend to counterbalance seasonal trends.
